Title:
Rocket Navigation System

Abstract:

□

Theme:
Control Engineering

Project Period:
Spring Semester 2017

Project Group:
group CE6-633

Participants:
Geoffroy Sion
Mathias Nielsen
Jacob Lassen
Raphaël Casimir
Maxime Remy
Romain Dieleman

Supervisor:
Kirsten Nielsen
Tom Pedersen

Page Numbers: ??

Date of Completion:
?? June 2017

The content of this report is freely available, but publication may only be pursued with reference.

Preface

This report is composed by group CE6-633 during the 6th semester of Electronic Engineering and IT at Aalborg University, 2017. The study of wireless power transfer and drone tracking described in this report is part of the theme *Control Engineering*.

For citation the report employs IEEE style referencing. If citations are not present by figures or tables, these have been made by the authors of the report. Units are indicated according to the SI system.

The natural logarithm is denominated by ln and $\log_{10}$ is the base 10 logarithm.

A period is used as a decimal mark. Half a space is used as a 100 0 separator.

Aalborg University, February 9, 2017
